

SMOOTHING WITH MOVING MEDIANS.

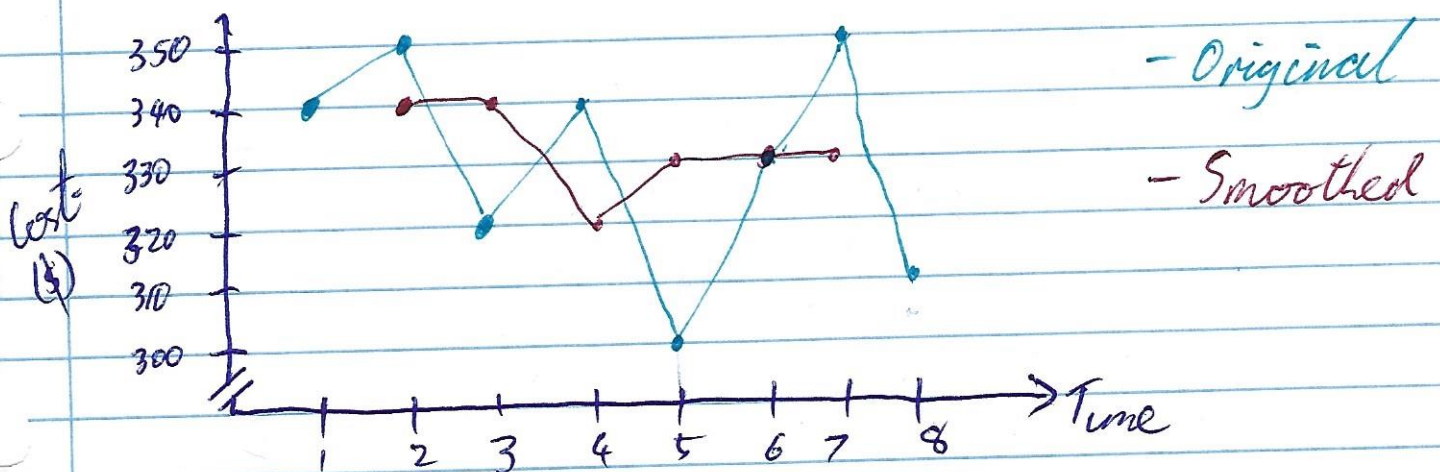

This is very similar to moving mean. Instead we use the MEDIAN.

From a table.

eg Perform 3-point moving Median Smoothing on the data in the table. Construct a time-series plot.

Time	1	2	3	4	5	6	7	8
Cost (\$)	340	350	320	340	300	330	350	310

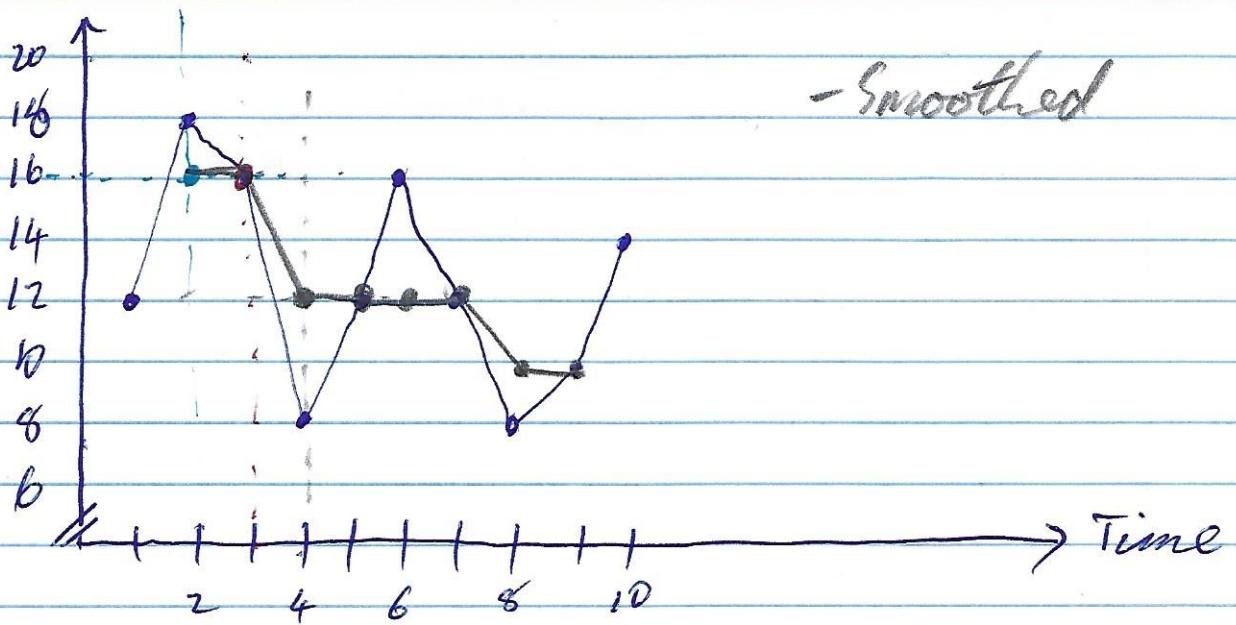

Smoothed		340	340	320	330	330	330	
----------	--	-----	-----	-----	-----	-----	-----	--

We can also perform moving median smoothing on a graph.

Eg

Perform a 3-point median smoothing on the graph below.

Questions: Ex 6C on Work Plan.
